field county in 1829, commencing practice at Pittsfield in 1830, when he was admitted to the bar of Berkshire county, and removed to Lenox in 1865. He was a member of the State house of representatives from 1834 to 1838, and was speaker from 1835 to 1838, in which latter year he was appointed bank commissioner, holding the office three years. He was a representative in Congress from 1847 to 1851, and United States senator for two sessions, by appointment of Gov. Washburn, to fill the vacancy made by the resignation of Mr. Everett. In 1853 he was a member of the convention to revise the constitution of the State; a presidential elector in 1856; in 1858 he was again speaker of the house of representatives of Massachusetts, and at the organization of the superior court, in 1859, he was made one of its judges, which position he still retains. He was the eighth president of the Berkshire County Bible Society.

Amos Shephardson, of Milford, was a captain in the war of the Revolution, being at the battle of Lexington, also in the vicinity of the scene at the time capture of Major Andre. Lovitt, son of Amos, served in the war of 1812, and was present at the battle of Plattsburgh. He married Sally Perry, of Newfane, Vt., in 1816, and came to Lenox in 1826. His son, W. T., who is extensively engaged in the manufacture of brick, married Celia Balcolm, and resides on road 4. Munro, brother of W. T., married Siloma Ingalls, and has had born to him fifteen children, of whom five sons and three daughters survive. Munro has been deputy sheriff twenty-two years, and constable twenty-five years.

Michael Broderick, of Newtown, Ireland, married Mary Gorman, in 1826, and emigrated to America in 1832, lived at Boston and New York, and finally came to Lenox in 1841, locating upon the Jessie Root farm, on Bald mountain. Elizabeth, daughter of Michael, became the wife of George H. Russell. Three sons and five daughters of Michael are now living.

James A. Farrington, of Bennington, Vt., came to this town in 1847, where he took charge of the iron foundry. He was twice married, having a family of three children, Arthur R. of this town, Mrs. D. W. Shaw, and Mrs. O. P. French.

Thomas Leakey, a native of county Cork, Ireland, emigrated to this country in 1848, and located in Lenox. He married Mary Coherty of Claremont, in 1853, and reared a family of seven children: Mary, Michael, Cornelius, Anna, John, Thomas and James. Cornelius, married Eliza Mullen, daughter of Cornelius Mullen, of Galway, Ireland, and resides on road 37.

Frederic William Rackemann was born in Bremen, Germany, in 1821. His long residence in Lenox, his great love of the place and of the delightful scenery which surrounds it, and his zealous interest in the welfare of the town, were such as to make his foreign birth almost forgotten, although the first twenty years of his life were passed in Bremen. Born of a musical family, he manifested his unusual gifts in that line at a very early age, and performed at times the duties of the organist in the Cathedral while he was still too

small to reach the pedals with his feet. Later, in spite of great obstacles, he devoted himself with great assiduity, to the piano-forte, though after the death of his father, the breadwinner, the student, of necessity, became the teacher, and at fourteen years of age he gave piano lessons in Bremen, the fruits of his industry being turned into his mother's scanty purse. He remained with her as long as her life lasted, and then, after making a successful debut as a concert giver in his native town, he sailed for America—then as now the hope of youth, the land of promise. He established himself in New York in 1842, where his acquaintance increased rapidly and spread widely, not more perhaps on account of his unusual gift of music than by virtue of his social proclivities and his rapid acquirement of the English tongue, which eventually was like a second nature to him. There are now so many remarkable and distinguished pianists that it is difficult to-day to realize how great a mark the advent of one made in those days. As a teacher Mr. Rackemann's great fidelity and enduring patience gave him a steady success and reputation—a great deal of the good amateur work which has been done in New York in the past years might justly be traced to his influence and inspiration. He was one of the early habitués of Lenox, before it was the thronged summer resort which it has become, and his friendship with Mr. Charles Sedgwick's family resulted in his marriage with Mr. Sedgwick's second daughter, Elizabeth, in 1855, since when he always passed his summers in Lenox, and eventually settled in the Sedgwick homestead where he latterly resided throughout the year. From this time he identified himself with the place, taking a warm and active interest in it. Where interest was first awakened the project of reviving the "Lenox Academy," fifty years since quite a famous "seat of learning," to which pupils flocked from north, west, and south, but which had fallen into decay, it was mainly through Mr. Rackemann's unwearied personal exertion that sufficient funds were collected to render the undertaking feasible. He took an ardent interest in it, and became one of the trustees when the academy was re-established. He was also one of the trustees of the Lenox "Charles Sedgwick Library and Reading Room," and a chosen member of the "Lenox Improvement Society." His character was one of singular earnestness, purity and modesty. Of firm convictions, frank, gentle, hospitable and liberal to a fault, those who knew him best loved and esteemed him most. He died at Lenox, August 16, 1884.

Lenox has had several centenarians, among whom may be mentioned the following: Phoebe Washburn, aged 100 years; her step-grandmother, Mrs. Gates, who died at the age of 101; Mrs. Tabitha Scott, who died in 1821, aged 107 years; Mrs. Jabez Ellis, who died in 1831, aged 100 years and Mrs. Silence Bonny, who died in 1859, aged 103 years.

The Congregational Church of Lenox.—In 1769 Rev. Samuel Hopkins, of Great Barrington, organized this church. Rev. Samuel Munson, a graduate of Yale in 1763, was ordained as its pastor November 8, 1770. Soon afterwards a church building was erected near the site of the present building

This year I mean to try to keep
my diary more regularly than
ever before. I have made
several "good resolves" for the
New Year which I hope
I shall be able to carry out
to my satisfaction. —

Frank Sedgwick came
yesterday: he will stay here
a week. In the morning
we went coasting on the
Court House Hill. We called
at Mr. Field's. After coming
home we played hide and
seek in the barn.

We dined at four o'clock
and at half past six
Felix, Frank, & I went down
to Mrs. Hotchkiss to tea.

We enjoyed ourselves very
much & played Verbarium.
We came home at ten o'clock
and went to bed tired.

BY NANCY MARASCO

FRIDAY, JANUARY 2, 1874.

I did not get up very early this morning, because I was up late both last night and night before. After breakfast I built a fire in the Library and read and read in hour. Then we decided to go to the Lake to fish and skate. At twelve o'clock we started and on reaching the Lake found to our great disgust no skating. However we set out 3 lines and at three P.M. having had no bites, because we baited with raw meat, we came back. Mr. Campbell^d overtook us by the "Bush brook" and I rode up to the Cheese Factory where I walked home. In eve Frank took tea at Rev. J. Fields. — In order to keep this diary regular I shall have to write much more regularly. *(X Buller's)*

After breakfast I built a fire in the Library and read a little while, and then I did some little "chores" around the house & barn, after which Frank and I went to the village coasted down the Court House Hill once & then walked over to Mr. Haggins's, not finding him or his wife at home we went to Luther Buller's where we stayed a few minutes looking at his stock. We then went back to Mr. Haggins's and waited ten minutes, but as they did not return we started to come home and about 1/4 of a mile from their house we met them. When we reached home Frank looked over his pictures and so forth. Very pleasant eve. Games.

two or 3 games of everlasting.

Then I came in and put

FRIDAY, SEPTEMBER 25, 1874.

Harry was to have called me in time for breakfast, but as he did not do it, I was late. After breakfast I sat down and wrote a letter to Papa and Mamma and helped Cousin Alice put the paper into order, and hang some pictures. Then at a quarter past ten I went into town. Cousin Alice who went over to Cambridge took my overcoat down to a man on Jamaica Plain.

I went to Inst. Tech. and found that I am admitted. Then went round to Williams & Everett's and looked over the pictures in their gallery. I saw some that I was charmed with. Home in 115 train. Do the P. M. read, took a stroll N. E. St.

In the city walked with Harry & Mamma with Cousin Alice.

SATURDAY, SEPTEMBER 26, 1874.

Up in time for breakfast. After breakfast I wrote me Harry for two days, then took up my book for her answer and then went into town with Cousin Alice. After doing one or two errands on Front St. we took a horse-car and went to the Fair in South Sq.

Spent most of our time in looking at the many and found some pictures by Stickley which we admired very much. We then walked thro' the other departments & not finding anything interesting we stopped only a few times and then returned home in 115 train.

The principal things which interested me were the exhibition for smoking iron ore for cutting iron & steel, some family-made wagons, harnesses & a meat-chopper, some fine china, & a lot of the celebrated stuffed birds, models of ships & a model of a steam engine.

Up this morn'g 7:40
Right after breakfast
helped Cousin Alice for
an hour or two and then
after waiting 5 minutes
Aunt Kate & Uncle William
came with Bob, which
delighted me infinitely.
We went up - stairs and
had a good deal of fun
while Bob unpacked, and
then coming down began
to write a letter home.

pack his trunk and put
things away generally.

The gymnasium in the
hall is getting on very

things are adding slow-

SATURDAY, OCTOBER 17, 1874.

Nothing to do in school today but Logia. So got away at ten o'clock.

Went down to the end of Berkeley St. to look at a room which would not suit. So turned back and went out to Cambridge and first made a call on Mrs.

Barri, who was at home.

Then I went into the college yard & left cards in J. Goddard's & F. Watson's rooms not finding them.

Then went down to Uncle P.'s and after waiting a little while he came home.

Very glad to see him since with Miss Anne, and took the first train for Woodbourne and had a ride on

"white sheep" as Uncle William calls it. Alice's white horse.

In evening passed pleasant time

SUNDAY, OCTOBER 18, 1874.

Uncle William & Edie came back from Lenox last evening. Aunt Kate is coming on Monday the 19th.

They found scarcely any sport in Lenox. Birds all

about weather cloudy and chilly. Bob & I went to town to hear Mr. Brooks.

I liked the sermon very much indeed. It was of the importance of living a thoroughly Christian life without in such a

way that you shall not give any offense, not be disagreeable in any

way "to Jew Gentile nor the Church of God". Mr. B. is

preacher at the Inst. Bch. —

In the P.M. Bob, Laurence, & I

took a walk to the hills with the Arabian Owl which will

soon. Bob & I were home

by one of Belle's Hill.

Very good.

Spent in evening —

MONDAY, OCTOBER 19, 1874.

Got off to 8²⁰ train.

Bob went with me, on his way to College. I got thro' nicely. I like Mr. Wells, our instructor in Algebra, very much and find him very clear & kind. At one o'clock

I went down to the Office (Bq Court) and to get some crayons. Got my rolls in the Prov. Sta. Went to Gymnasium for few minutes. Many good things there lately. More every day.

At half past four I went down to the B&A depot and met Mr. State. Very glad to see him & know that all are well at home.

Shall not keep my weather coat in for much longer but shall transfer it to this diary. The book is nearly full. I am going up on Friday. Perhaps B&A go to Canada on the Foot & Mail on Friday.

Read Boutgar's book

TUESDAY, OCTOBER 20, 1874.

Took shoes to Dick Cook-
ranner on way to school.
All went well except the
questions in Chemistry --
At one o'clock I had

just finished calling, and
after staying in the gym-
nasium half an hour.

I went up to the Reading-
room and wrote a letter
to Father about my ~~out~~
work. Then I went down

to Father, and got my
letter. I wrote back to
him. I went into the Reading-
room. Did my two
assignments in 2 1/2 hours.

Then came out in the 5¹⁰
train. Studied Algebra
in the evening about 7 o'clock
a little better. Had supper in
my room as Nurse had said. I
then went to Harry's room --
Read 9.

WEDNESDAY, OCTOBER 21, 1874

Have not much to say for today, as I do not write till Sat' night. Have been awfully busy. Went down town at noon & took my cup cover back to be exchanged. Then went to Soll & Richards to order some pictures for Aunt Julia. Worked at my drawing for an hour in the P.M. and then went to drill. Drilled on Newbury Street. Like the drill out-doors very much. Then went back to Soll & Richards for the pictures and came out to Woodbourne in the 5.70 train. Studied Greek in the evening.

Oct 21 9.50

Aunt Julia improved daily.

THURSDAY, OCTOBER 22, 1874

Did very little today outside of the regular routine! Logic and Chemistry in the morning ~~books~~! I answered all that was asked of me without much trouble. The first examination comes next Friday & next.

At one o'clock I went down to Soll & Richards and paid a bill for Aunt Mary. Then had my lunch and went back to the Inst. Got to work at my drawing early and evening finished my "Sketch". Filled board space the paper in the 1.30 train & then I took a good deal of time. Wrote Logic in eng & Studied Algebra & French.

Oct 22.

FRIDAY, OCTOBER 23, 1874

This morning we had Algebra, French & French drawing. In French we have begun on Hubert's Plates: and today I nearly finished a copy of the I. We also threw in Crayon and the shading is very hard, yet I like the drawing very much. Algebra goes on nicely.

At one o'clock I went down town to do errands for Aunt Kate, when I went to Mr. Papanti. He has agreed to arrange lessons if all can be arranged rightly. My drill on Wed. will interfere badly. I do not want to give up either thing. I want very much to learn to dance. Zdzinski thinks I can not be transferred to St. I. I shall know soon. Before we leave - Studied a little -

Packed trunk on train from town (5:25)

SATURDAY, OCTOBER 24, 1874

Went in at 8:30 as usual. Logic this morning; and then I went up stairs and stayed till half-past eleven & finished my plate.

Then I cleared my board and gave it to Fogg to shellac. Went to Ashburton Place to see how Robison is placed. Found his room small but tidy & having a good deal of sun. I could get one on 5th one floor for 1/2. 2 windows & much space. Only objection is that I must take it for the whole winter and by the single month. — Bob & Will went shooting and got 4 Woodcock & 1 Partridge — Not a big bag.

I got home at 2 o'clock. Wrote to Mr. Baldwin & played football with Lawrence & Al.

Then wrote a note with Uncle Will. I am in a pleasant home (tho' I dislike it) — Boston

SUNDAY, OCTOBER 25, 1874.

Bob went to the Lawless
last evening and is coming
back this P.M. In the
morning Harry went to
church and Will went
to walk, first with Uncle
William and then with
George. I wrote to Father
and Mr. R. & read a good deal
in "Wilson's Ornithology" &
"Youatt on the Dog".

After dinner I took a stroll with Harry & Frank and at half past four went to walk with Harry & Laurence up Hetcher-creek Hill. Bob came back to tea. In eve I studied French & Algebra & read quite a talk with Will.

MONDAY, NOVEMBER 2, 1874.

Everything as usual this morning. Did not have time to prepare all the problems but got all that we were handed up on except two.

At noon I went down to the office, and to Fairbanks & Mosely's and got Betty's shoes. Mechanical drawing in the afternoon.

I have got my woodwork nearly done and my stone-work started. Studied in the evening and got a few minutes to row on the machine.

I shall try to row on it every day but am afraid I cannot.

TUESDAY, NOVEMBER 3, 1874.

Thermometer only 12° in M. Olney's m. ad. this morning. Aunt Anne Levert passed the night here. Before school I went up to Fayette.

Went to Mrs Briggs to take a parcel for Aunt Kate.

At 11 o'clock I went down town to Hovey's & bought 8 new linen collars. My percent on Chemistry is only 25.

I do not exactly understand this. I have tried to avoid much study in the evening but have not been able to.

With more study I should have undoubtedly have got a larger per cent.

Studied hard in the eve. and rowed on the machine five miles.

WEDNESDAY, NOVEMBER 4, 1874.

Thermometer only 16°
in Mr. Olney's meadow.

I got to school in
good season with all
the algebra but two.

At one o'clock I went
down to the common, having
heard the cannon in honor
of Governor Gaston who
was elected yesterday.

I had drill from 2.30
to 3.30. The uniforms

came today. The coats

have black buttons; and

mine is very tight under

the arms. Went to dancing

school and learned a part of

the gallop and a part of a chain

advice. Got away at a

little before 5.30 and

went to Fayette Street.

Just missed the 5.45

train came out at 6.10.

Had a long study in the eve.

THURSDAY, NOVEMBER 5, 1874.

Had to get around to
get ready for the train.

Had with me in good

season. My racket which

to the school to look up

had a rush some

the year. Got my time

and went in school.

Was at the school

and was out in

the morning school.

Got home

at 6.10

Got down to the train
very early, the 'cars
rather secured on the
way down by hearing
the train the other
side of Rockville & think-
ing that it was this
side. Got on well
with lessons. Had no
French today. At
one o'clock I went
down to Beach St to pay
a bill for Aunt Kate
and to St Grange St
to give my jacket
to the tailor to make
over about the arms.

This year I mean to try to keep my diary more regularly than ever before. I have made several "good resolves" for the New Year which I hope I shall be able to carry out to my satisfaction. —

Frank Sedgwick came yesterday; he will stay here a week. in the morning we went coasting on the Court House Hill. We called at Mr. Field's. After coming home we played hide and seek in the barn.

We dined at four o'clock and at half past six.

Frank, Frank & I went down to Mr. Horton's to see.

We enjoyed ourselves very much & played Verbarium. We came home ten o'clock and went to bed. tired.

field county in 1829, commencing practice at Pittsfield in 1830, when he was admitted to the bar of Berkshire county, and removed to Lenox in 1865. He was a member of the State house of representatives from 1834 to 1838, and was speaker from 1835 to 1838, in which latter year he was appointed bank commissioner, holding the office three years. He was a representative in Congress from 1847 to 1851, and United States senator for two sessions, by appointment of Gov. Washburn, to fill the vacancy made by the resignation of Mr. Everett. In 1853 he was a member of the convention to revise the constitution of the State; a presidential elector in 1856; in 1858 he was again speaker of the house of representatives of Massachusetts, and at the organization of the superior court, in 1859, he was made one of its judges, which position he still retains. He was the eighth president of the Berkshire County Bible Society.

Amos Shepardson, of Milford, was a captain in the war of the Revolution, being at the battle of Lexington, also in the vicinity of the scene at the time capture of Major Andre. Lovitt, son of Amos, served in the war of 1812, and was present at the battle of Plattsburgh. He married Sally Perry, of Newfane, Vt., in 1816, and came to Lenox in 1826. His son, W. T., who is extensively engaged in the manufacture of brick, married Celia Balcolm, and resides on road 1. Munro, brother of W. T., married Siloma Ingalls, and has had born to him fifteen children, of whom five sons and three daughters survive. Munro has been deputy sheriff twenty-two years, and constable twenty-five years.

Michael Broderick, of Newtown, Ireland, married Mary Gorman, in 1826, and emigrated to America in 1832, lived at Boston and New York, and finally came to Lenox in 1841, locating upon the Jessie Root farm, on Bald mountain. Elizabeth, daughter of Michael, became the wife of George H. Russell. Three sons and five daughters of Michael are now living.

James A. Farrington, of Bennington, Vt., came to this town in 1847, where he took charge of the iron foundry. He was twice married, having a family of three children, Arthur R. of this town, Mrs. D. W. Shaw, and Mrs. O. P. French.

Thomas Leabey, a native of county Cork, Ireland, emigrated to this country in 1848, and located in Lenox. He married Mary Coherly of Claremont, in 1853, and reared a family of seven children: Mary, Michael, Cornelius, Anna, John, Thomas and James. Cornelius, married Eliza Mullen, daughter of Cornelius Mullen, of Galway, Ireland, and resides on road 37.

Frederic William Rackemann was born in Bremen, Germany, in 1821. His long residence in Lenox, his great love of the place and of the delightful scenery which surrounds it, and his zealous interest in the welfare of the town, were such as to make his foreign birth almost forgotten, although the first twenty years of his life were passed in Bremen. Born of a musical family, he manifested his unusual gifts in that line at a very early age, and performed at times the duties of the organist in the Cathedral while he was still too

small to reach the pedals with his feet. Later, in spite of great obstacles he devoted himself with great assiduity, to the piano-forte, though after death of his father, the breadwinner, the student, of necessity, became teacher, and at fourteen years of age he gave piano lessons in Bremen, fruits of his industry being turned into his mother's scanty purse. remained with her as long as her life lasted, and then, after making a successful debut as a concert giver in his native town, he sailed for America—as now the hope of youth, the land of promise. He established himself New York in 1842, where his acquaintance increased rapidly and spir widely, not more perhaps on account his unusual gift of music than by tue of his social proclivities and his rapid acquirement of the English tongue which eventually was like a second nature to him. There are now so m remarkable and distinguished pianists that it is difficult to-day to realize l great a mark the advent of one made in those days. As a teacher Mr. Rackemann's great fidelity and enduring patience gave him a steady success; reputation—a great deal of the good amateur work which has been done New York in the past years might justly be traced to his influence and inspiration. He was one of the early habitués of Lenox, before it was the throng summer resort which it has become, and his friendship with Mr. Charles Sedgwick's family resulted in his marriage with Mr. Sedgwick's second daughter, Elizabeth, in 1855, since when he always passed his summers in Lenox and eventually settled in the Sedgwick homestead where he latterly resided throughout the year. From this time he identified himself with the plan taking a warm and active interest in it. When interest was first awakened the project of reviving the "Lenox Academy," fifty years since quite a famous "seat of learning," to which pupils flocked from north, west, and south but which had fallen into decay, it was mainly through Mr. Rackemann's unwearied personal exertion that sufficient funds were collected to render the undertaking feasible. He took an ardent interest in it, and became one of the trustees when the academy was re-established. He was also one of the trustees of the Lenox "Charles Sedgwick Library and Reading Room," a chosen member of the "Lenox Improvement Society." His character was one of singular earnestness, purity and modesty. Of firm conviction, frank, gentle, hospitable and liberal to a fault, those who knew him loved and esteemed him most. He died at Lenox, August 16, 1884.

Lenox has had several centenarians, among whom may be mentioned the following: Phoebe Washburn, aged 100 years; her step-grandmother Mrs. Gates, who died at the age of 101; Mrs. Tabitha Scott, who died 1821, aged 107 years; Mrs. Jabez Ellis, who died in 1831, aged 100 years; and Mrs. Silence Bonny, who died in 1859, aged 103 years.

The Congregational church of Lenox.—In 1769 Rev. Samuel Hopkins, of Great Barrington, organized this church. Rev. Samuel Munson, a graduate of Yale in 1763, was ordained as its pastor November 8, 1770. Soon afterwards a church building was erected near the site of the present building.
